How To Measure Your Shoe Size:

Fold the sheet with the template along the dotted line. Place the sheet with the folded side against a wall. Place your foot on the template. Your heel should touch the wall. Put weight on the front of your foot as well. Make sure your foot is on the same line as the template. Read your shoe size by your big toe. If the big toe is over the line, choose the larger size.

Want to measure your shoe size without the template? Place both feet (without shoes) on a paper and trace the outline. Hold the pencil upright! Then measure both foot lengths in centimeters. If the measurements differ, take the larger one. Now you can read your size on the table.

Thank You For Your Trust in Stuco!

Do you need safety or other professional shoes? Stuco is safety footwear manufacturer and stands for Swiss quality since 1898. Stuco shoes are 100% produced at Stuco Kft. in Hungary. The production is ISO 9001 / 14001 certified and is continuously checked and audited according to BSCI social standards. Development and design come from Stuco AG Switzerland. Thus, in Stuco shoes, in addition to uncompromising quality, there is always social responsibility and sustainable environmental awareness.
